DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4,7 & 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawai et al (Analytical Biochemistry vol. 209 pp. 63-69 1993).

Kawai et al teach immobilizing oligonucleotides by contacting the oligonucleotides onto polystyrene plates and then fixing by UV irradiation at 254 nm (see whole doc. esp. abstract).

They teach single stranded probes with 60 repeats of sequence (see abstract). They teach hybridization and detection (see abstract).
